

UK.145.01173	Capability list	
--------------	------------------------	---

Revision No.	279	Revision date:	20 th May 2021	Document reference:	WA/CAPABILITYLIST/001
--------------	-----	----------------	---------------------------	---------------------	-----------------------

Components shall only be added to the World Aero capability list (WA/CAPABILITYLIST/001) upon completion of World Aero Form 0051 which details the items which must be satisfied prior to addition to the capability list. Regardless of Form 0051 completion, no capability shall be added unless the addition is within the permitted "scope of maintenance" detailed in MOE Section 1.9 Scope of Work but may be limited if identified below. For details, refer to World Aero MOE 1.9 and 1.10. World Aero are authorised to issue a Certificate of Release to Service for the components and parts thereof as listed below. The part numbers identified below for wheels are those of the basic wheel as identified by the type certificate holder (OEM), in some cases the operator's or aircraft manufacture's part number for the wheel and tyre assembly may be used on the release document (Form 1) in which case the wheel part number shall be identified in block 12 of the Form 1.
